# About ArrayZone

Array Zone Group is a leading export-oriented apparel manufacturer and supply chain based in Dhaka, Bangladesh. We manufacture a wide range of apparel items including Sweater, Woven and Knitwear for our global customers.

Our professional service is involved in designing, product development, production and quality assurance for ready-made garments.

We own and operate four factories. Two sweaters, one knit and one woven unit. All of our production units are ethically and environmentally compliant and certified like BSCI, SEDEX, WRAP etc.

Apart from these own factories, the manufacturing of our products take place in a carefully selected network of other production units.

To keep our next generation safe we emphasize on sustainable production and maintain compliance issues strictly to ensure workers ethical issues, working environment & safety.

Form the amenableness on society  
Array Zone Group takes part in regular social work and included CSR in its business model.

## **Production capacity:**

- ☉ Knitwear : 210000 Pcs/ Month
- ☉ Woven : 270000 Pcs/ Month
- ☉ Sweater : 800000/ Month

## **Production Lead time :**

- Knit : 60-90 days.
- Woven : 90 days for local fabric & 120 days for imported fabric.
- Sweater : 90 days for local yarn & 120 days for imported yarn.

For the repeat orders, we need less lead time and it is negotiable during the order placement time.

## Minimum order quantity :

ARRAY ZONE does not set any specific minimum order quantities per style, color and size. We support the client regardless of the order quantities. It goes without saying that higher order quantities will result in more competitive prices. So, for those clients who want to know the MOQ, we recommend them to place minimum order quantities of 2000 pcs/Per style and 1000 pcs/Color.

## Quality Assurance :

Quality comes first. Every clients have the right to expect high quality garments. ARRAY ZONE will guarantee you the top quality assurance control is implemented in each of our factories during production. ARRAY ZONE has established its own set of quality procedures. Moreover, if the client wish to apply its own quality standards we can easily accommodate to that request as well. We do believe that quality can not be achieved by inspection that's why ARRAY ZONE ensures that the first fabric/ yarn lot of every new order is tested at their in-house facilities as well as our facilities in the office. Once the approval is given the factory may proceed with cutting. Once the order has been completed ARRAY ZONE team of quality auditors perform a final audit or we cooperate third party quality controllers as per client requirement and send a copy of the final audit report to the client.

## Rules of origin:

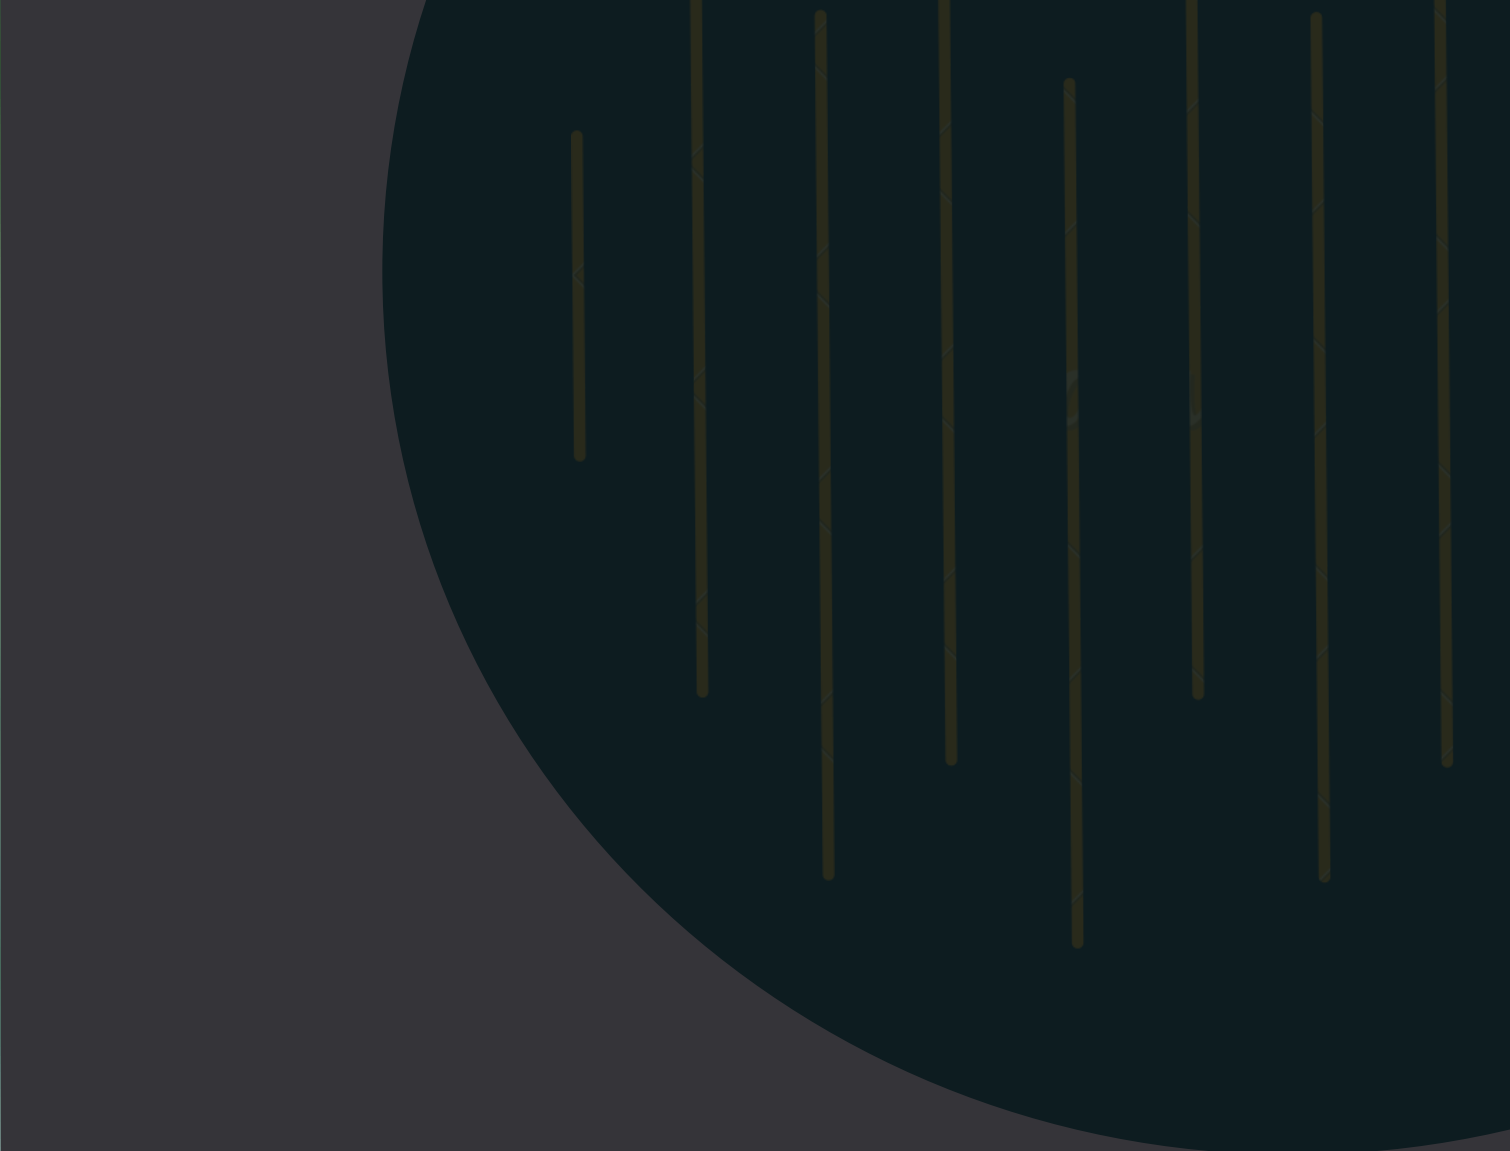

One of the key advantages of sourcing from Bangladesh is the duty free and quota free access to the European Union under the EBA (Everything But Arms) initiative. The EBA has been created as special arrangements for LDCs (Least Developed Countries) and will be maintained for an unlimited period of time. Goods are considered originating from Bangladesh if there is sufficient working or processing. The normal proof of origin is the certificate of origin Form A. In general that means at least "From yarn forward" for knit. For Woven "From Fabric Forward" and for sweater "From Dyeing Forward". When quoting the prices based on the base size sample, ARRAY ZONE will also check with the factory and the Export Promotion Bureau in Bangladesh to ensure that the product fully complies with the rules of origin and Form A is an obtained.

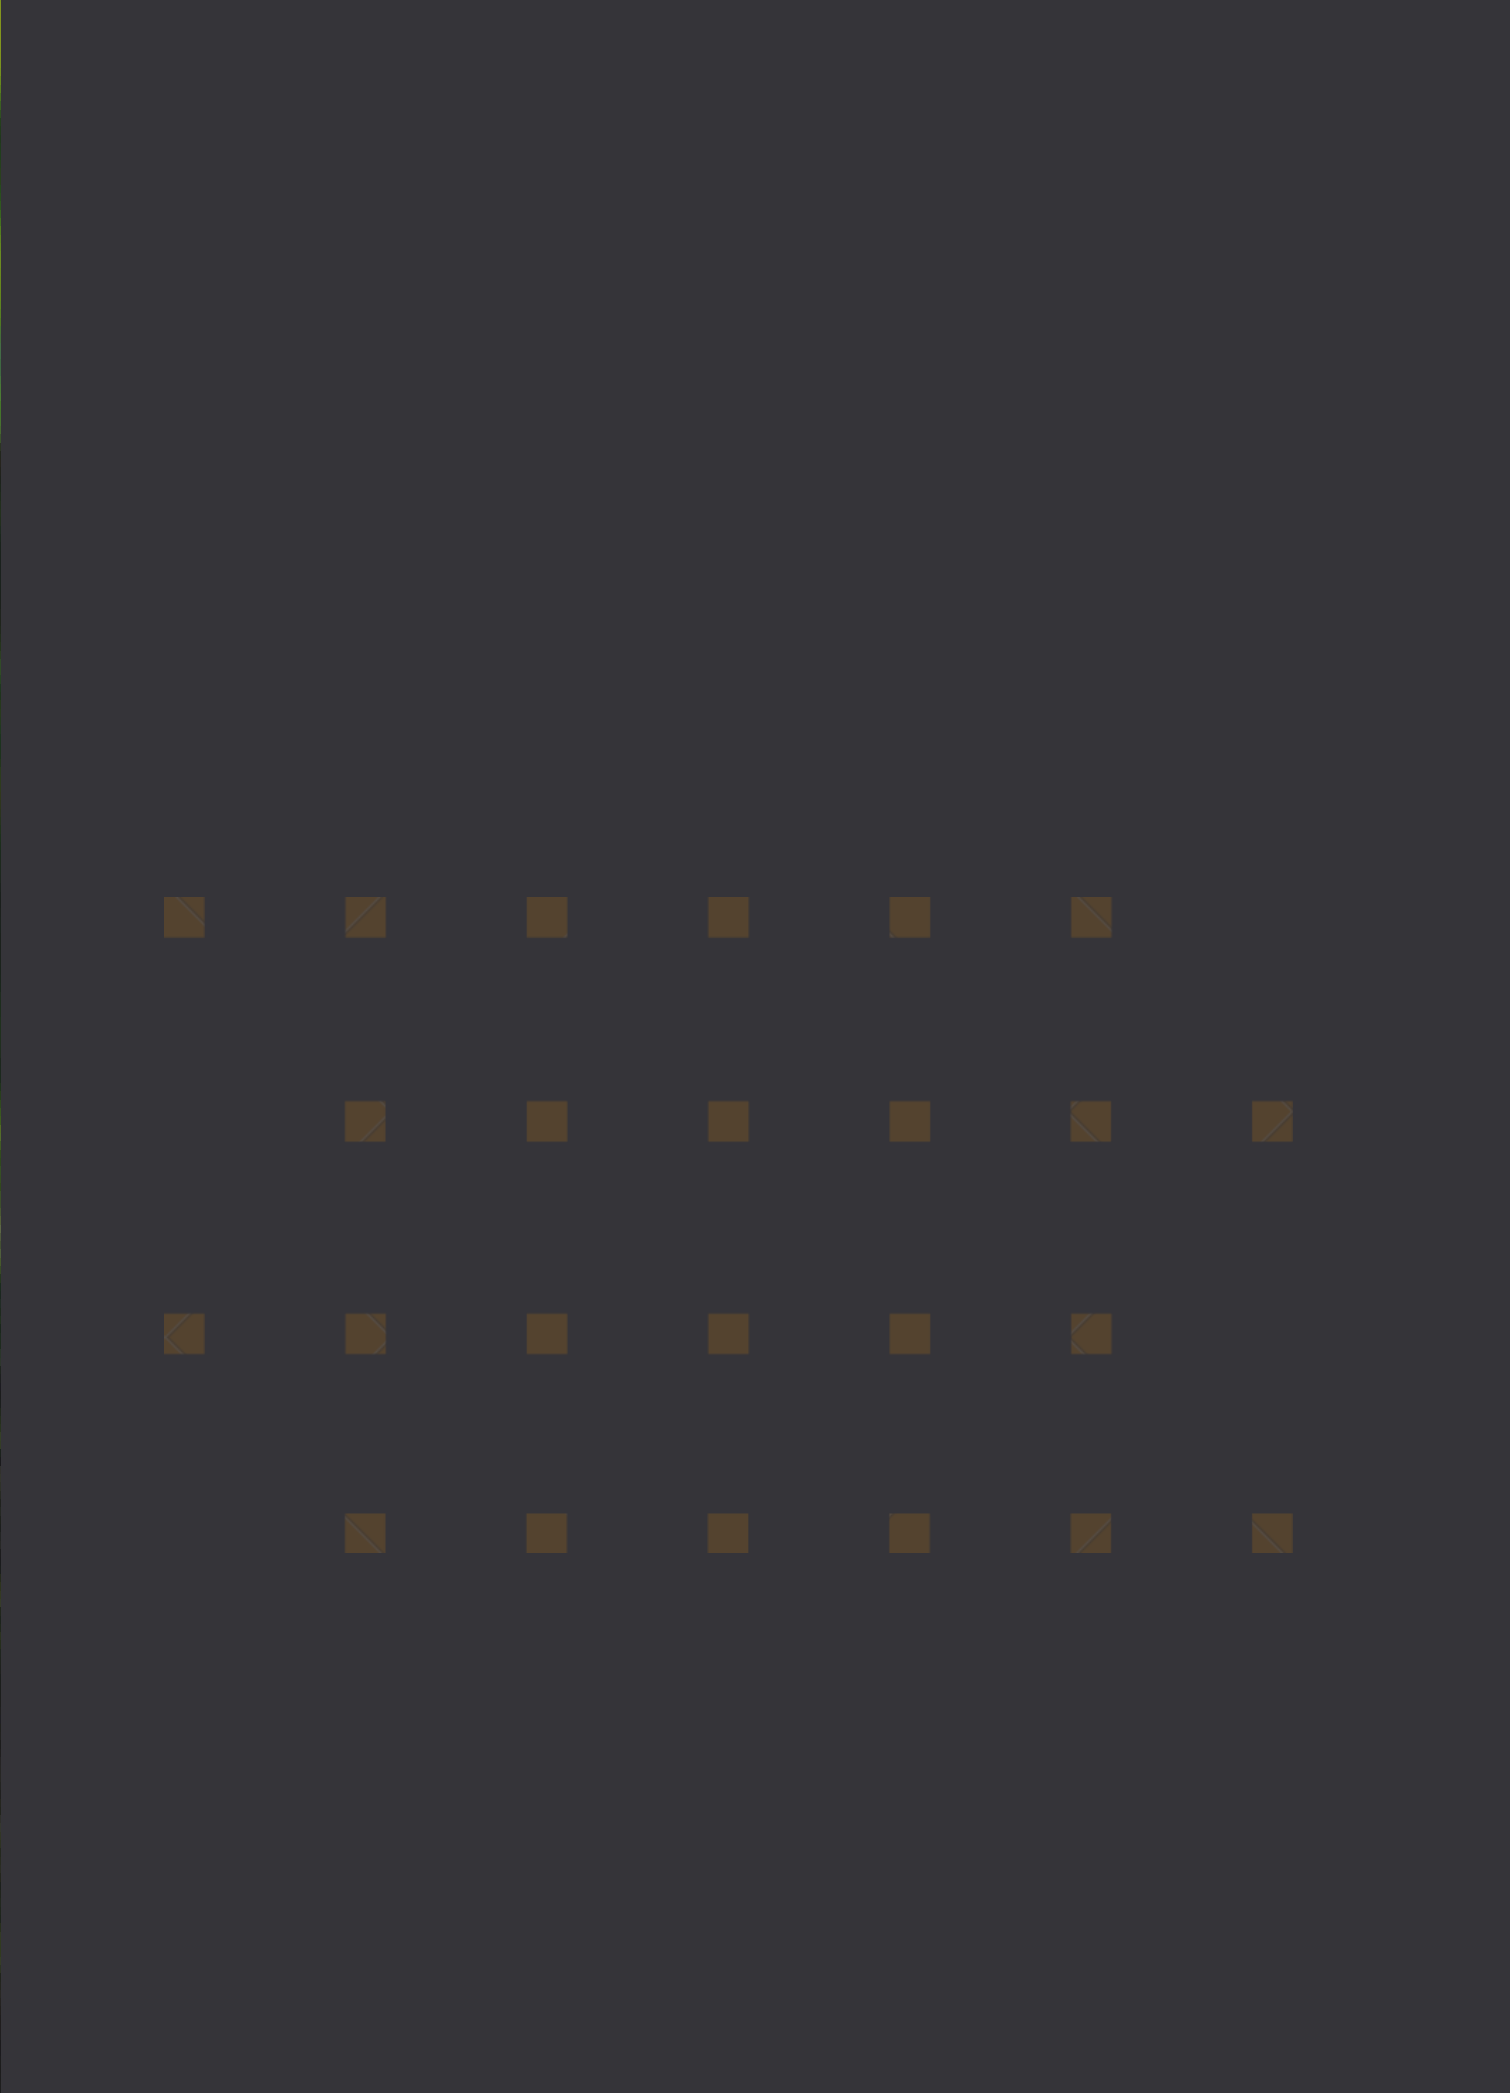

## Sustainability:

ARRAYZONE believes in sustainable production and gives the top priority to the preservation of nature and ecological balance by utilizing reusable resources so there is no negative impact on the environment.

## Compliance:

Our factories are socially and environmentally compliant and having certification like amfori BSCI, SEDEX, WRAP, etc. As much as we care about customer satisfaction & customer requirements etc. we also care about having our goods produced in a work-friendly environment.
